

Who are we?

Recognized by Forbes as one of the top ten companies reinventing the TV industry, Nuvvyo is a growing consumer electronics and app development company. Founded in 2010 we are leading innovation in the Over-The-Air TV industry in both the US and Canada. We are constantly looking for ways to grow and are searching for the right talent to join our team. The TV Industry is seeing immense change and we want to be on the forefront of that movement.

Launched in 2014, Tablo is our DVR for TV antennas that targets the growing trend of cord-cutting and enables consumers to save thousands of dollars by cancelling expensive cable and satellite TV contracts and replacing them with free Over-The-Air (OTA) HDTV and internet video from companies like Netflix and Hulu.

Why work at Nuvvyo?

Unlike ultra large tech companies where you are lost in a sea of Developers, at Nuvvyo being a part of a small, but high-performing team of UI developers will allow you the opportunity to really contribute and share your ideas and vision for the product. Our small size and fluid space also allow for quick collaboration with all members in the company from Management to Support.

It also helps that we are located in the heart of Kanata's technology hub with free parking and easy access to transit.

Opportunity

Nuvvyo is looking for an Android Developer who is passionate about creating beautiful, polished apps that customers love using. In this role, you will design and implement new features for the Tablo Android TV app. We are looking for self-starters who will hit the ground running from day one.

We're a small team that cares deeply about building the best user experiences. We sweat the details from the UI all the way down to the well-tested codebase. There's never a shortage of interesting and challenging work to get done. We all wear a lot of hats, and you will too.

We're constantly experimenting with new tools and technology, but right now we work with Java, MVVM, RxJava, RxAndroid, and Robolectric. We also use GitHub, Slack, and Clubhouse for planning and collaborating.

What You'll Do

- Own features for the Android app from concept through development and implementation

- Ensure that your code works as designed by writing automated unit tests, which run as part of our continuous integration workflow
- Show attention to detail when building user experiences and writing concise, robust, and elegant code
- Instrument your code to keep the app fast and responsive
- Participate in code reviews to both teach and learn from your peers
- Brainstorm and experiment with new ideas to help guide the product

What You'll Bring

- 2+ years of professional Android development experience
- Experience building custom views and animations
- Deep understanding of Android, its frameworks, and best practices
- Significant experience interfacing with web APIs. We use HTTP, WebSockets, and JSON
- Demonstrated ability to work independently
- Experience shipping to the Google Play Store (please send along a link if you can)

To apply, please send your resume to careers@nuvyyo.com.

We thank all applicants for their interest; however, only those to be interviewed will be contacted.

For more information about Nuvyyo, please visit our company and product website at <http://www.nuvyyo.com> and <https://www.tablotv.com/>. Also please feel free to google Tablo TV and see what they are saying about our products!
